

MnDOT Office of Environmental Stewardship (OES) personnel will manage all contract and technical issues associated with assessment, removal and oversight activities of asbestos containing materials and other regulated materials. In the event that adequate time is not available for OES to contract the work directly, the following special provisions are available to ensure that the work is completed in accordance with regulations and MnDOT policy. The below Special Provisions can be found at: <http://www.dot.state.mn.us/pre-letting/prov/index.html>

Special Provisions

1701	Laws to be observed (Sanitary) – Building Extermination
1701	Laws to be observed (Building Removals)
1701	Laws to be observed (Bridge/Deck Removals)
