

Relation To Water

*1/3 = Refers to landforms; landform must cover at least 1/3 of the parcel for parcel to be designated as such.

- If 2/3 or more of parcel is wet, it is usually considered unsurveyable.

- Wetland borders are determined by tick marks of blue symbols, not topographic lines.

*500 = Refers to water; if any portion of parcel is within at least 500 feet of water, the parcel may be designated as such.
